PDFlib® pCOS

Licensing Notes

pCOS Use Cases and Features

There are many application scenarios for PDF Information Retrieval Tool PDFlib pCOS within PDF workflows, but you can also use PDFlib pCOS as a tool for learning or debugging PDF. Here are some typical situations:

- ▶ check incoming documents for predefined criteria
- ▶ identify problem files in a large collection
- ▶ create metadata summaries for document management
- ▶ quality assurance before publishing documents
- ▶ document retrieval and repository workflows
- ▶ summarize the bookmarks
- ▶ extract components of PDF documents, e.g. ICC profiles

With PDFlib pCOS you can retrieve PDF metadata, hypertext, and other components from a PDF document. All objects outside the actual page content can be retrieved with a simple interface, without the need for low-level parser programming (pCOS is short for PDFlib Comprehensive Object Syntax).

With PDFlib pCOS you can extract a variety of interesting items from PDF documents. The following list is not exhaustive, but mentions some of the more important uses:

- ▶ general information: linearized PDF, tagged PDF, encryption details and permission settings, number of pages and fonts
- ▶ document info entries and XMP metadata
- ▶ fonts and their name, embedding status, etc.
- ▶ images, color spaces and other resource types
- ▶ target URLs and coordinates of Web links
- ▶ form field data: full field names, contents, position, etc.
- ▶ page size, CropBox, page rotation
- ▶ status of ISO standards PDF/X, PDF/A, PDF/UA, and PDF/E
- ▶ list or extract file attachments
- ▶ enumerate the names of layers (optional content)
- ▶ bookmark, annotation, and comment details
- ▶ digital signature details
- ▶ extract ICC output intent profiles from PDF/X or PDF/A documents
- ▶ find JavaScript on document, page, annotation, or field level

Value added Tax (VAT)

Like all EU businesses, PDFlib GmbH's invoicing and VAT handling is governed by EU law:

- ▶ Customers from non-EU countries will not be charged VAT.
- ▶ Customers from Germany will be charged 19% VAT (MwSt.).
- ▶ Customers from all other EU countries must provide their VAT identification number to avoid VAT being added to the invoice.

Support

We offer optional support contracts in combination with a new product license, or to renew an existing support contract. Customers with an active support contract will benefit from the following advantages:

- ▶ technical support with short response times
- ▶ all minor (maintenance) and major (functional) updates included
- ▶ early availability of bug fixes
- ▶ maintenance releases and technical support available until the end of a product's lifetime
- ▶ additional licenses can be purchased until the end of the lifetime

For a detailed description of support benefits please refer to our General License and Support Conditions which are available on our Web site. The support fee is 18% of the license fee per year.

Support contracts can optionally be renewed automatically every 12 months until the support is expressly terminated by the customer. In order to terminate a support agreement with automatic renewal please inform us one month before the support expires.

Scope of a License

One license covers a single computer running under the selected operating system (platform), regardless of the number of CPUs. Development licenses for machines which are not used for production purposes and run under the same operating system are free with each purchase. Redundant (backup) machines do not require a separate license, provided they are never used concurrently with the actual production machines. Groups of load-balancing servers require a license for every server in the group.

Operating System Platform

Supplying the name of the target operating system platform is a strict requirement since the license is bound to a specific platform. The license is valid for all supported language bindings (programming languages) on the selected platform.

Updates of older Versions

An update changes an older license to a license for a newer version on the same platform, thereby invalidating the old license. A valid license key must be supplied with each update order. The following table indicates the fees for updates as a percentage of the target product's list price:

To	Update from pCOS 2
pCOS 3	60% of the target product's list price

Free Updates with active Support

Customers with an active support agreement are eligible for a free update to pCOS 3. The free update must be requested during the active period of the support agreement. For example, if you terminate your support agreement in October 2010, you can no longer request a free update after this date.

Volume Discounts

Volume discounts are available for multiple licenses of the same product according to the table below, provided all licenses are ordered with a single combined order.

number of licenses	discount off the list price
5	10%
10	15%
20	40%
50	60%
100	75%
200	80%

Premium Licenses

In addition to machine-based licenses PDFlib GmbH offers Premium licenses with extended rights, such as site licenses and source code licenses.

Premium licenses are available at a fixed license fee and do not require any additional royalties. They can be combined with support. Please contact premium@pdflib.com for more information about these license types.
