Page 1:
Place the full image in its original size, with a transparency of $50 \%$

## Page 2:

Output a part of the image in its original size:
p.fit_image(image, $x, y$, "matchbox=\{clipping=\{35\% 35\% 75\% 75\%\}\}");

Place a part of the image in a given box:
p.fit_image(image, $x$, y, "matchbox=\{clipping=\{35\% 35\% 75\% 75\%\}\} boxsize=\{300 200\} fitmethod=meet showborder");
